Thanks Kathy. This is helpful for our working group. Let us know if you would like to be present during any of the sampling activities.

Laura

Dear Kathy and Liz:<?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

Attached is the NWOD Working Group's supplement to our November 9<sup>th</sup> 2010 Memorandum regarding our proposed Remedial Design and Implementation Approach. This is intended to respond to EPA's request for a work plan for a sediment quality study for Segment 1 of the NWOD Canal.

Please let us know if you have any questions or comments on this. We are planning to conduct soil sampling during the week of December 6, 2010 in order to stay on schedule, so we would appreciate your feedback soon.

At this time, it looks like we will start the sampling on Monday December 6<sup>th</sup>; we are happy to have you there with us if you want to observe the sampling activities and sediment.

As per our November 9<sup>th</sup> 2010 Memorandum, we anticipate completion and compilation of the results of all of the Design Studies by mid-to-late February.

Thank you and have a good Thanksgiving holiday.

Laura
